Assignment-Special Repeat

Date : 30th September 2024
Time : 1:30 p.m. to 2:30 p.m.

INSTRUCTIONS TO CANDIDATES

- This question paper consists of **TWO** questions.
- Answer **ALL** questions.
- You should write answers in lined papers legibly in black or blue ink.

Question 01

(100 Marks)

The figure mentioned below are the output from the biological databases.

A.

Structure Summary | Structure | Annotations | Experiment | Sequence | Genome | Versions

Biological Assembly 1

6SCJ
 The structure of human thyroglobulin
 PDB DOI: <https://doi.org/10.2210/pdb/6SCJ/pdb> EM Map EMD-10141: EMD EMDDataResource

Classification: HORMONE
Organism(s): Homo sapiens
Expression System: Homo sapiens
Mutation(s): No

Deposited: 2019-07-24 **Released:** 2020-02-12
Deposition Author(s): Coscia, F., Turk, D., Lowe, J.
Funding Organization(s): Medical Research Council (United Kingdom), Wellcome Trust

Experimental Data Snapshot

Method: ELECTRON MICROSCOPY
Resolution: 3.80 Å
Aggregation State: PARTICLE
Reconstruction Method: SINGLE PARTICLE

wwPDB Validation

Metric	Percentile Ranks	Value
Clashscore	5	5
Ramachandran outliers	0.1%	0.1%
Sidechain outliers	0.5%	0.5%

Date : 30th September 2024
Time : 9.00 a.m. to 12.00 p.m.

INSTRUCTIONS TO CANDIDATES

- This question paper consists of SIX questions.
Answer ALL questions.
You should write answers in lined papers legibly in black or blue ink.

Question 01 (100 Marks)

1.1. Define the term "Data". (20 marks)

Dotted lines for answer to 1.1

1.2. State the four types of level of measurements and give an example of each. (20 marks)

Dotted lines for answer to 1.2

1.3. Differentiate the continuous data and discrete data using examples. (30 marks)

Dotted lines for answer to 1.3

1.4 Compare and contrast the primary and secondary sources with an example of each.

00002
(30 marks)

.....
.....

.....
.....
.....

Question 02 (100 Marks)

A microbiologist investigated the presence of bacteria in water samples collected from various river sites. After incubating the samples on a nutrient-rich medium for 48 hours, the following numbers of Colony Forming Units (CFU) per milliliter were recorded:

12, 28, 101, 42, 79, 53, 16, 24, 19, 31, 26, 36, 75, 90, 21

2.1. Compute the mean, mode, and median of the CFU data. (30 marks)

.....
.....
.....
.....
.....
.....
.....
.....
.....
.....

2.2. Find the variance and standard deviation for these measurements. (50 marks)

.....
.....
.....
.....
.....
.....
.....
.....
.....
.....

2.3. Mention the key characteristics of a normal distribution curve. (20 marks)

.....
.....
.....
.....

Question 03 (100 Marks)

The weights of students in a college are normally distributed with a population standard deviation of 6.2 kg. A random sample of 50 students had a mean weight of 70 kg.

3.1. Estimate the population mean with 90% and 95% confidence intervals.

(40 marks)

00002

3.2. List five essential characteristics of a strong research question.

(20 marks)

3.3. Differentiate the independent and dependent variables and provide an example of each type.

(40 marks)

Question 04

(100 Marks)

A company is assessing the effectiveness of various employee training programs on improving productivity. The manager has noticed that employees who undergo a particular training program seem to have higher productivity levels. To explore this observation, an ANOVA test is performed to determine whether the training program has a significant impact on productivity outcomes.

The ANOVA table of the analysis is provided below.

Source	SS	df	MS	F
Between	2000	3	?	?
Within	3000	29	?	
Total	5000	32		

4.1. Calculate the Mean Square (MS) values.

(40 marks)

4.2. Determine the F value.

(20 marks)

00002

.....

.....

.....

.....

.....

.....

.....

.....

4.3. Find the critical value at the significance level of 0.05.

(20 marks)

.....

.....

.....

4.4. Interpret the results and state the decision of the test.

(20 marks)

.....

.....

.....

Question 05

(100 Marks)

5.1. List nucleotide and protein sequence databases available on the internet.

(30 marks)

.....

.....

.....

5.2. Name five online resources provided by the National Library of Medicine accessible through PubMed.

(30 marks)

.....

.....

.....

.....

5.3. Differentiate the key features of Genbank and EMBL output formats.

(40 marks)

.....

.....

.....

.....

.....

.....

.....

.....

Question 06

(100 Marks)

6.1. State the purpose of "Sequence alignment".

(30 marks)

.....

.....

.....

6.2. State the main bioinformatics tool used for sequence alignment. (30 marks)

.....
.....
.....

6.3. Mention are the two main types of sequence alignment. (40 marks)

.....
.....
.....
.....

Equations

- Variance

$$S^2 = \frac{\sum X^2 - \frac{(\sum X)^2}{n}}{n-1}$$

- Confidence interval

$$\bar{x} \pm z \frac{s}{\sqrt{n}}$$

- ANOVA table

Summary ANOVA

Source	Sum of Squares	Degrees of Freedom	Variance Estimate (Mean Square)	F Ratio
Between	SS_B	$K - 1$	$MS_B = \frac{SS_B}{K - 1}$	$\frac{MS_B}{MS_W}$
Within	SS_W	$N - K$	$MS_W = \frac{SS_W}{N - K}$	
Total	$SS_T = SS_B + SS_W$	$N - 1$

Higher Diploma in Biomedical Sciences
HD 2223 - Pharmacology
2nd Batch

Special Repeat SEQ Examination - 2nd Year 2nd Semester

Date: 26th September 2024

Time: 09.00 am – 12.00 pm – Three Hours

Question 01 (100 Marks)

1.1 Name the components of Pharmacokinetics. (25 Marks)

.....
.....
.....

1.2 State the two types of drug metabolism. (25 Marks)

.....
.....
.....

1.3 What is the role of albumin in drug transport in blood? (25 Marks)

.....
.....
.....
.....

1.4 What are the types of drug elimination kinetic ? (25 Marks)

.....
.....
.....
.....

Question 02 (100 Marks)

2.1 What are the receptors in the sympathetic system? (25 Marks)

.....
.....
.....

2.2 Compare followings
2.2.1. Salmeterol and salbutamol (25 Marks)

.....
.....
.....
.....
.....
.....

2.2.2. Adverse effect and side effect

(25 Marks)

.....

.....

.....

.....

.....

2.3 Give one example of drug adverse effects.

(25 Marks)

.....

.....

.....

.....

.....

Question 03

(100 Marks)

3.1 List drug groups used for general anaesthesia.

(50 Marks)

.....

.....

.....

3.2 What are the drugs used for local anaesthesia?

(50Marks)

.....

.....

.....

Question 04

(100 Marks)

4.1 List the drugs in an oral contraceptive pills.

(25 Marks)

.....

.....

.....

.....

4.2 What you do mean by placebo tablets in oral contraceptive pill packet?

(50 Marks)

.....

.....

.....

4.3 State the advice which will be given to patient who needs oral contraceptive pills.

(25 Marks)

.....

.....

.....

Question 05

(100 Marks)

5.1 What are the drugs used for hyperthyroidism ?
(25 Marks)

(25

.....
.....
.....

5.2 What are the clinical features of hyperthyroidism?

(50 Marks)

.....
.....
.....

5.3 List the different types of insulin.

(25 marks)

.....
.....
.....
.....

Question 06

(100 Marks)

6.1 What are the types of receptors of the sympathetic system ?

(30 Marks)

.....
.....
.....
.....
.....

6.2 List the clinical uses of adrenaline.

(30 Marks)

.....
.....
.....
.....
.....

6.3 State the receptors blocked by propranolol.

(10 Marks)

.....
.....
.....
.....

6.4 What is the mode of action of propranolol?

(30 Marks)

.....
.....
.....
.....

Faculty of Health Sciences

Higher Diploma in Biomedical Science

HD 2233 – Biostatistics and Bioinformatics

2nd year 2nd semester – Batch 2

Assignment

Date : 16th August 2024
Time : 1:30 p.m. to 2:30 p.m.

INSTRUCTIONS TO CANDIDATES

- This question paper consists of **TWO** questions.
- Answer **ALL** questions.
- You should write answers in lined papers legibly in black or blue ink.

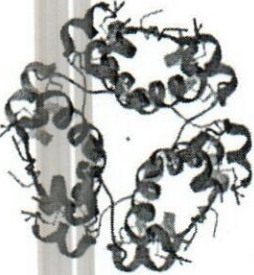

Question 01

(100 Marks)

The figure mentioned below are the output from the biological databases.

A.

Biological Assembly 1
Display Files Download Files Data API

5CNY
Crystal Structure of human zinc insulin at pH 5.5
PDB DOI: <https://doi.org/10.2210/pdb5CNY/pdb>
Classification: HORMONE
Organism(s): Homo sapiens
Expression System: Saccharomyces cerevisiae
Mutation(s): No

Deposited: 2015-07-18 Released: 2015-08-26
Deposition Author(s): Palmieri, L.C., Lima, L.M.T.R.

Experimental Data Snapshot
Method: X-RAY DIFFRACTION
Resolution: 1.70 Å
R-Value Free: 0.213
R-Value Work: 0.155
R-Value Observed: 0.158

wwPDB Validation

Metric	Percentile Ranks	Value
R-free		0.202
Clashscore		11
Rama-Randam outliers		0
Sidechain outliers		3.3%
RSRZ outliers		2.9%

1. Percentile relative to all X-ray structures
2. Percentile relative to X-ray structures of similar resolution

This is version 1.0 of the entry. See complete history.

1.3. State the key characteristics of a normal distribution curve.

(20 marks)

.....
.....
.....
.....

Question 02

(100 Marks)

2.1. Define the term "Variable".

(20 marks)

.....
.....
.....

2.2. State the different types of data on the numerical variables and give an example of each.

(20 marks)

.....
.....
.....
.....

2.3. Differentiate the quantitative data and qualitative data using examples.

(30 marks)

.....
.....
.....
.....
.....

2.4 Depending on the source of data collection, sources of data could be classified as primary and secondary sources. Compare and contrast the primary and secondary sources with an example of each.

(30 marks)

.....
.....
.....
.....
.....

Question 03

(100 Marks)

The heights of students in a high school are normally distributed with a population standard deviation of 4.5 cm. A random sample of 40 students had a mean height of 160 cm.

3.1 Estimate the population mean with 90% and 95% confidence intervals.

(40 marks)

.....
.....

3.2. Identify five key features of a well-formulated hypothesis. (20 marks)

3.3. State the role of the null hypothesis in scientific research. (20 marks)

3.4. Differentiate the independent and dependent variables and provide an example of each type. (20 marks)

Question 04

(100 Marks)

A university is evaluating the impact of different study methods on the final exam scores in a Mathematics course. The instructor has observed that students who use a specific study method tend to perform better. To investigate this, an ANOVA test is conducted to examine whether the study method affects final exam scores.

The ANOVA table of the analysis is provided below.

Source	SS	df	MS	F
Between	2000	3	?	?

4.1. Calculate the Mean Square (MS) values. (40 marks)

4.2. Determine the F value.

(20 marks)

.....
.....
.....
.....
.....
.....
.....
.....

4.3. Find the critical value at the significance level of 0.05.

(20 marks)

.....
.....
.....

4.4. Interpret the results and state the decision of the test.

(20 marks)

.....
.....
.....
.....

Question 05

(100 Marks)

5.1. State two nucleotide and protein sequence databases available on the internet.

(20 marks)

.....
.....
.....
.....

5.2. State five NCBI databases accessible through ENTREZ.

(20 marks)

.....
.....
.....
.....
.....

5.3. Differentiate the features of Genbank and EMBL output formats.

(20 marks)

.....
.....
.....
.....
.....
.....
.....
.....

5.4. List two DNA sequence analysis tools used for gene prediction and drug discovery.

(40 marks)

.....
.....
.....
.....

Question 06**(100 Marks)**

6.1. Define the term of "Sequence alignment".

(20 marks)

6.2. State the main bioinformatics tool used for sequence alignment.

(20 marks)

6.3. Refer to the following substitution matrix and calculate the score for sequence A given below.

(60 marks)

	C	T	A	G
C	+1	-1	-1	-1
T	-1	+1	-1	-1
A	-1	-1	+1	-1
G	-1	-1	-1	+1

ATGGCG Query Sequence

Sequence A- ATGGCG

ATG-AG the score=.....

A-TGAG the score=.....

Equations

- Variance

$$S^2 = \frac{\sum X^2 - \frac{(\sum X)^2}{n}}{n-1}$$

- Confidence interval

$$\bar{x} \pm z \frac{s}{\sqrt{n}}$$

- ANOVA table

Summary ANOVA

Source	Sum of Squares	Degrees of Freedom	Variance Estimate (Mean Square)	F Ratio
Between	SS_B	$K - 1$	$MS_B = \frac{SS_B}{K - 1}$	$\frac{MS_B}{MS_W}$
Within	SS_W	$N - K$	$MS_W = \frac{SS_W}{N - K}$	
Total	$SS_T = SS_B + SS_W$	$N - 1$

HD 2233 Pathology
2nd Year 2nd Semester

Date: 15th of August 2024

Time: 09.00 am – 12.00 pm – Three Hours

Question 01

(100 Marks)

1.1 Write five differences between acute inflammation and chronic inflammation.

(25 Marks)

1.2 Compare regeneration and repair

(25 Marks)

1.3 List five (05) cardinal signs of inflammation

(25 Marks)

1.4 Write a short note on coagulative necrosis

(25 Marks)

Question 02

(100marks)

2.1 Write short notes on the following

2.1.1 Atrophy

(25 Marks)

2.1.2 Hypertrophy

(25 Marks)

2.1.3 Hyperplasia

(25 Marks)

2.1.4 Metaplasia

(25Marks)

Question 03

(100 Marks)

3.1 Name **four (04)** signs and symptoms of gastritis

(40 Marks)

3.2 Name **three (03)** complications of peptic ulcer

(30 Marks)

3.3 Write **three (03)** risk factors for intestinal neoplasms

(30 Marks)

Question 04

(100 Marks)

4.1 What is Atherosclerosis?

(30 Marks)

4.2 Name two (02) complications of atherosclerosis

(30 Marks)

4.3 Name four (04) clinical signs and symptoms of Acute Renal Failure

(40 Marks)

Question 05

(100 Marks)

5.1 What is Dysmenorrhea?

(30 Marks)

5.2 What is Amenorrhea?

(30 Marks)

5.3 What are the signs and symptoms of Pelvic Inflammatory Disease?

(40 Marks)

HD BMS Batch 02
End Semester SEQ Examination

Date : 12th of August 2024
Time : 09.00 am – 11.00 a.m (Two Hours)

INSTRUCTIONS TO CANDIDATES

- This question paper consists of **FOUR** questions.
- Answer **ALL** questions.
- You should write legibly in black or blue ink.
- You are not allowed to take out the examination papers.

QUESTION 01 **(100 marks)**

1.1. State **three (03)** types of physical resources in a laboratory. (15 marks)

.....

.....

.....

1.2. State the key practices involved in the effective management of equipment in a microbiology laboratory. (40 marks)

.....

.....

.....

.....

.....

1.3. Write the importance of the calibration of laboratory equipment. (30 marks)

.....

.....

.....

1.4. Compare the accuracy of burette and graduated cylinders used in the laboratories. (15 marks)

.....

.....

.....

AJS

QUESTION 02

(100 marks)

2.1. You have given concentrated stock solution of 12 mol dm^{-3} HCl in 2.5 L.

2.1.1. Calculate the volume required from the stock solution of concentrated HCl to prepare 250 ml of 0.2 mol dm^{-3} HCl solution. (20 marks)

.....
.....
.....
.....

2.1.2. State the safety precautions that should be taken when handling concentrated HCl. (20 marks)

.....
.....
.....
.....

2.2. You have given a 10X concentrated buffer solution and you need to prepare 1 liter of a 1X working solution.

2.2.1. Calculate the dilution factor. (20 marks)

.....
.....
.....
.....

2.2.2. Calculate the volume required from the stock solution. (20 marks)

.....
.....
.....
.....

2.3.3. How you would verify the accuracy of the prepared 1X buffer solution ? (20 marks)

.....
.....
.....
.....

QUESTION 03

(100 marks)

3.1. List 05 (five) events in the pre-analytical phase.

(10 marks)

.....
.....
.....
.....
.....

3.2. Outline the effect of sample collection variables on the final report of the investigation.

(30 marks)

.....
.....
.....
.....
.....
.....

3.3. State the types of errors that can happen in the analytical phase of the testing process.

(30 marks)

.....
.....
.....
.....
.....

3.4. State the actions that can be taken to minimize the errors mentioned in 3.3.

(30 marks)

.....
.....
.....
.....
.....

QUESTION 04

(100 marks)

4.1 State the four (04) key managerial functions.

(10 marks)

.....
.....
.....
.....

4.2 Delegation of responsibilities is important for the smooth functioning of a laboratory. Briefly explain your views on this opinion using the knowledge of managerial functions. (30 marks)

.....
.....
.....
.....
.....

4.3. Imagine as the laboratory manager you have decided to upgrade the available three-part hematology analyzer to a five-part hematology analyzer.

4.3.1. Outline the factors that need to be considered before conducting the above procedure. (30 marks)

.....
.....
.....
.....
.....

4.3.2. Outline the process of purchasing the new haematology analyzer for the laboratory. (30 marks)

.....
.....
.....
.....
.....

Question 01 **(100 Marks)**

1.1 What is ADME in Pharmacokinetics? **(25 Marks)**

.....
.....
.....

1.2 State the two types of drug metabolism. **(25 Marks)**

.....
.....
.....

1.3 How drugs are transported in blood? **(25 Marks)**

.....
.....
.....

1.4 What is the elimination kinetic of alcohol? **(25 Marks)**

.....
.....
.....

Question 02 **(100 Marks)**

2.1 What is meant by sympathomimetic drugs? Give examples **(25 Marks)**

.....
.....
.....

2.2 Compare followings **(25 Marks)**
2.2.1. Salmeterol and salbutamol.

.....
.....
.....

2.2.2. Adverse effect and side effect.

(25 Marks)

.....

.....

.....

.....

.....

.....

2.3 List the types of adverse effects.

(25 Marks)

.....

.....

.....

.....

.....

.....

Question 03

(100 Marks)

3.1 List drugs groups used for general anaesthesia.

(30 Marks)

.....

.....

.....

3.2 What are the drugs used for local anaesthesia?

(25 Marks)

.....

.....

.....

3.3 List three drugs used for depression.

(20 Marks)

.....

.....

.....

.....

3.4 List the side effects of the drugs you mentioned in 3.3.

(25 Marks)

.....

.....

.....

.....

Question 04

(100 Marks)

4.1 List the drugs in an oral contraceptive pills.

(25 Marks)

.....

.....

.....

.....

.....

4.2 What you do mean by placebo tablets in oral contraceptive pill packet ? (25 Marks)

.....
.....
.....

4.3 State the advice which will be given to patient who needs oral contraceptive pills. (30 Marks)

.....
.....
.....

4.4 State the other contraceptive devices. (20 Marks)

.....
.....
.....

Question 05 (100 Marks)

5.1 What is the drug used for hypothyroidism ? (25 Marks)

.....
.....
.....

5.2 What are the clinical features of hypothyroidism? (25 Marks)

.....
.....
.....

5.3 What are the drugs used for the treatment for hyperthyroidism & indicate the mode of action? (25 Marks)

.....
.....
.....

5.4 List the different types of insulin and oral hypoglycaemic drugs (25 marks)

.....
.....
.....

Question 06 (100 Marks)

6.1 What are the types of receptors of sympathetic system ? (20 Marks)

.....
.....
.....

.....
.....
6.2 List the clinical uses of adrenaline (30 Marks)

.....
.....
.....
.....
.....
.....

6.3 State the receptors blocked by propranolol. (10 Marks)

.....
.....
.....
.....

6.4 What is the mode of action of propranolol? (25 Marks)

.....
.....
.....
.....
.....

6.5 Explain why propranolol is not given in patients with bronchial asthma. (15 Marks)

.....
.....
.....
.....

Duration 2 hrs

INDEX NUMBER:

Date : 13.02.2023

Time : 09.00 am – 11.00 am (2 hours)

INSTRUCTIONS TO CANDIDATES

- This question paper consists of FOUR questions.
- Answer ALL questions.
- You should write legibly in black or blue ink
- You are not allowed to take out the examination papers.

Question 01	(100 marks)
1.1 State three types of laboratories	(15 marks)
1.2 State five topics that are contained in a standard operating procedure.	(25 marks)
1.3 State four types of laboratory waste.	(20 marks)
1.4 Briefly describe two methods of disposing of laboratory chemical waste.	(20 marks)
1.5 State two things that should be considered when considering the safety of a laboratory.	(20 marks)

Question 02 (100 marks)

- 2.1 How many grams of Sodium chloride (NaCl) should you use to make 37 ml of a 1.0 mol dm⁻³ solution? (Na – 23 g/mol, Cl - 35.5 g/mol) (20 marks)
- 2.2 How do you make a 1:300 dilution of a bacillus spore sample? (20 marks)
- 2.3 Find the dilution factor if 2.5 ml of a stock solution is combined with 7.5 ml of water. (20 marks)
- 2.4 How would you prepare 3% (W/V) NaCl solution in 100ml of water (w/v = weight (of a solute) per final solution volume) (20 marks)
- 2.5 A rainwater sample has a H⁺ concentration of 1×10^{-5} . Find the pH of the rainwater. (20 marks)
- $\text{pH} = -\log ([\text{H}^+])$

Question 03 (100 marks)

- 3.1 Define record retention (10 marks)
- 3.2 What are the elements of a patient order form for a test? (20 marks)
- 3.3 Describe 3 components of analytical phase to monitor for ensuring the reliability of results. (30 marks)
- 3.4 State the features of Standard Operating Procedures. (10 marks)
- 3.5 Describe the patient's rights which covered by Patient's Bill of Rights. (30 marks)

Question 04 (100 marks)

- 4.1 What is a Laboratory Information Management System (LIMS)? (10 marks)
- 4.2 State the advantages of LIMS within a clinical laboratory. (10 marks)
- 4.3 Describe different sections of laboratory report of a test. (30 marks)
- 4.4 Mention the cost-effective measures which taken by clinical laboratory management. (20 marks)
- 4.5 Draw a Microbiology Laboratory floor plan and by referring to your plan state how to prevent contamination and provide protection to the laboratory worker. (30 marks)

INSTRUCTIONS TO CANDIDATES

- This question paper consists of **SIX** questions.
- Answer **ALL** questions.
- You should write legibly in black or blue ink.
- You are not allowed to take out the examination papers.

- Question 1** (100 marks)
- 1.1 Name 4 types of Cystic Diseases of the Kidneys (20 marks)
 - 1.2 Write a short note on Chronic Kidney Disease (30 marks)
 - 1.3 List the clinical signs and symptoms of Eclampsia (20 marks)
 - 1.4 Define the following disease conditions.
 - 1.4.1 Vaginal candidiasis (15 marks)
 - 1.4.2 Hypospadias (15 marks)
- Question 2** (100 marks)
- 2.1 Write short Notes of the followings
 - 2.1.1 Talipes Equinovarus (clubbed foot) (25 marks)
 - 2.1.2 Gout (25 marks)
 - 2.1.3 Cushing's disease (25 marks)
 - 2.1.4 Grave's disease (25 marks)
- Question 3** (100 marks)
- Briefly describe the followings.
- 3.1 Giant cells in chronic inflammation (25 marks)
 - 3.2 Coagulative necrosis (25 marks)
 - 3.3 Caseous necrosis (25 marks)
 - 3.4 Apoptosis (25 marks)
- Question 4** (100 marks)
- 4.1 Briefly describe the pathological changes in following stages of lobar pneumonia.
 - 4.1.1 Congestion (20 marks)
 - 4.1.2 Red Hepatisation (20 marks)
 - 4.1.3 Gray Hepatisation. (20 marks)
 - 4.1.4 Stage of Resolution (20 marks)
 - 4.2 Briefly describe on emphysema (20 marks)
- Question 5** (100 marks)
- 5.1 List cardinal signs of inflammation. (10 marks)
 - 5.2 Compare followings.
 - 5.2.1 acute inflammation and chronic inflammation (30 marks)
 - 5.2.2 Dry gangrene and wet gangrene. (30 marks)
 - 5.2.3 Regeneration & Repair. (30 marks)
- Question 6** (100 marks)
- Write short notes on followings.
- 6.1 Hypertrophy (25 marks)
 - 6.2 Hyperplasia (25 marks)
 - 6.3 Atrophy (25 marks)
 - 6.4 Metaplasia (25 marks)

End Semester SEQ Examination

INDEX NUMBER:

Date : 23th December 2022

Time : 9.00 a.m. to 12.00 p.m.

INSTRUCTIONS TO CANDIDATES

- This question paper consists of **SIX** questions.
- Answer **ALL** questions.
- You should write answers in lined papers legibly in black or blue ink.
- You are not allowed to take out the examination papers.

Question 01**(100 Marks)**

Assume that a research student wanted to find out whether the current crisis in Sri Lanka has significantly influenced on malnourishment of the children younger than 5 years. He sampled 20 children from a selected MOH area and the weight data observed were as follows.

10, 18, 8, 12, 11, 17, 12, 15, 13, 9, 10, 14, 12, 9, 9, 14, 16, 12, 15, 11

A statistical analysis performed has analyzed the following for the data set.

Mean=12.35; Median= 12; Mode=12; Standard deviation= 2.852; Variance= 8.134; Skewness=0.24

- 1.1. Estimate the population mean with 95% confidence Intervals. (30 marks)
- 1.2. What percentage of data values are actually within ± 1 and within ± 2 standard deviation of the mean. (50 marks)
- 1.3. Comment on distribution of data considering the skewness. (20 marks)

Question 02**(100 Marks)**

A biomedical scientist wanted to identify the bacteria species in a water sample taken from a pond. Therefore he plated the water samples taken from different sampling sites on Nutrient Agar. After 24 hours of incubation, the number of Colony Forming Units (CFU)/ mL, that he observed are as follows:

7, 16, 121, 51, 101, 81, 1, 16, 9, 11, 16

- 2.1. Find the mean, mode, median of this data. (30 marks)
- 2.2. Calculate the variance and standard deviation. (50 marks)
- 2.3. State the characteristic features of a normal distribution (20 marks)

Question 03**(100 Marks)**

- 3.1. What does it mean by "Research Hypothesis"? (10 marks)
- 3.2. List five characteristics of a good hypothesis. (20 marks)
- 3.3. Mention the difference between null and alternative hypothesis. (20 marks)
- 3.4. State the null and alternative hypothesis for the following research problem.

Obesity is a major health problem in Sri Lanka. A researcher is conducting research to show that people may be able to lose more weight on a low carbohydrate diet than on a low-fat diet.

Research Problem: Does the data suggest that, people are able to lose more weight on a low carbohydrate diet than on a low-fat diet on average? (50 marks)

Question 04**(100 Marks)**

- 4.1. What is "Data"? (10 marks)
- 4.2. Compare the data types of discrete and continuous data. (20 marks)
- 4.3. Order the following data types according to their statistical importance.
Nominal, ordinal, ratio and interval (20 marks)
- 4.4. List the two examples for each of the above-mentioned data types. (50 marks)

Question 05**(100 Marks)**

A university is assessing the performance of the students based on the semester end results for the subjects of Biology, Chemistry and Physics. The instructor has noticed that the students who are having higher attendance in Biology are more likely to perform well in other two subjects.

The instructor requires to check whether that there is an effect from the attendance of Biology to the results. The ANOVA table of the statistical analysis is mentioned below.

Source	SS	df	MS	F
Between	1900	2	?	?
Within	3355	21	?	
Total	5255	23		

- 5.1. Find the values of Mean Square (MS). (40 marks)
- 5.2. Calculate the F value. (20 marks)
- 5.3. Mention the critical value at the significance level of 0.05. (20 marks)
- 5.4. State the conclusion and the decision of the test. (20 marks)

Question 06**(100 Marks)**

- 6.1. What are the common data formats used in the biological databases? (10 marks)
- 6.2. State the difference between the FASTA format and PLAIN TEXT format. (20 marks)
- 6.3. List the information appear in the NCBI GENBANK format. (30 marks)
- 6.4. Mention the uses of regression analysis in statistics. (40 marks)

1.1. State the type of database. (20 marks)

1.2. Mention the example of the databases which would provide the following result.

A-.....

B-.....

(80 marks)

Question 02

(100 marks)

Mention the information that you could retrieve and the main components of the following FASTA output.

Aspergillus niger supercontig An01

GenBank: AM270980.1

Date : 16th February 2023
Time : 9.00 a.m. to 12.00 p.m.

INSTRUCTIONS TO CANDIDATES

- This question paper consists of **SIX** questions.
 - Answer **ALL** questions.
 - You should write answers in lined papers legibly in black or blue ink.
-

Question 01

(100 Marks)

A biomedical scientist wanted to identify the bacteria species in a water sample taken from a pond. Therefore, he plated the water samples taken from different sampling sites on Nutrient Agar. After 24 hours of incubation, the number of Colony Forming Units (CFU)/ mL, that he observed are as follows:

7, 16, 120, 51, 102, 81, 8, 16, 9, 11, 16, 24, 53, 76, 12

- 1.1. Find the mean, mode, median of this data. (30 marks)
- 1.2. Calculate the variance and standard deviation. (50 marks)
- 1.3. State the characteristic features of a normal distribution. (20 marks)

Question 02

(100 Marks)

- 2.1. What is "Statistics"? (10 marks)
- 2.2. Compare the data types of discrete and continuous data with an example for each. (20 marks)
- 2.3. Order the following data types according to their statistical importance.
Nominal, ordinal, ratio and interval (10 marks)
- 2.4. List the one for each of the above-mentioned data types. (60 marks)

Question 03**(100 Marks)**

Assume that a research student wanted to find out whether the current crisis in Sri Lanka has significantly influenced on malnourishment of the children younger than 6 years. He sampled 20 children from a selected MOH area and the weight data observed were as follows.

10, 18, 8, 12, 11, 17, 12, 15, 13, 9, 10, 14, 12, 9, 9, 14, 16, 12, 15, 11

A statistical analysis performed has analyzed the following for the data set.

Median= 12; Mode=12; Variance= 8.134; Skewness=0.24

- 3.1. Calculate the mean and standard deviation. (20 marks)
- 3.2. Estimate the population mean with 95% confidence Intervals. (30 marks)
- 3.3. What percentage of data values are actually within ± 1 and within ± 2 standard deviation of the mean. (50 marks)

Question 04**(100 Marks)**

- 4.1. List five characteristics of a good hypothesis. (20 marks)
- 4.2. Mention the importance of null hypothesis on research. (20 marks)
- 4.3. Differentiate the independent and dependent variable and provide the example for each type. (60 marks)

Question 05**(100 Marks)**

A school is assessing the performance of the advanced level students based on the term end results for the subjects of IT, Management and Statistics. The instructor has noticed that the students who are having higher assignment marks in Statistics are more likely to perform well in other two subjects.

The instructor requires to check whether that there is an effect from the assignment marks of statistics to the term end results. The ANOVA table of the statistical analysis is mentioned below.

Source	SS	df	MS	F
Between	1500	2	?	?
Within	3211	22	?	
Total	5342	24		

- 5.1. Find the values of Mean Square (MS). (40 marks)
- 5.2. Calculate the F value. (20 marks)
- 5.3. Mention the critical value at the significance level of 0.05. (20 marks)
- 5.4. State the conclusion and the decision of the test. (20 marks)

Question 06**(100 Marks)**

- 6.1. What are the components of the Bioinformatics? (10 marks)
- 6.2. Mention three nucleotide sequence databases available on the internet. (20 marks)
- 6.3. Write the information appear in the NCBI FASTA format. (30 marks)
- 6.4. List two protein databases and database mining tools. (40 marks)

Time : 9.00 a.m. – 12.00 p.m. (Three hours)

INSTRUCTIONS TO CANDIDATES

- This question paper consists of **SIX** questions.
- Answer **ALL** questions.
- You should write legibly in black or blue ink.
- You are not allowed to take out the examination papers.

- Question 1** (100 marks).
- 1.1 Name 4 types of Cystic Diseases of the Kidneys (20 marks)
 - 1.2 Write a short note on Chronic Kidney Disease (30 marks)
 - 1.3 List the clinical signs and symptoms of Eclampsia (20 marks)
 - 1.4 Define the following disease conditions.
 - 1.4.1 Vaginal candidiasis (15 marks)
 - 1.4.2 Hypospadias (15 marks)
- Question 2** (100 marks)
- 2.1 Write short Notes of the followings
 - 2.1.1 Talipes Equinovarus (clubbed foot) (25 marks)
 - 2.1.2 Gout (25 marks)
 - 2.1.3 Cushing's disease (25 marks)
 - 2.1.4 Grave's disease (25 marks)
- Question 3** (100 marks)
- Briefly describe the followings.
- 3.1 Giant cells in chronic inflammation (25 marks)
 - 3.2 Coagulative necrosis (25 marks)
 - 3.3 Caseous necrosis (25 marks)
 - 3.4 Apoptosis (25 marks)
- Question 4** (100 marks)
- 4.1 Briefly describe the pathological changes in following stages of lobar pneumonia.
 - 4.1.1 Congestion (20 marks)
 - 4.1.2 Red Hepatisation (20 marks)
 - 4.1.3 Gray Hepatisation. (20 marks)
 - 4.1.4 Stage of Resolution (20 marks)
 - 4.2 Briefly describe on emphysema (20 marks)
- Question 5** (100 marks)
- 5.1 List cardinal signs of inflammation. (10 marks)
 - 5.2 Compare followings.
 - 5.2.1 acute inflammation and chronic inflammation (30 marks)
 - 5.2.2 Dry gangrene and wet gangrene. (30 marks)
 - 5.2.3 Regeneration & Repair. (30 marks)
- Question 6** (100 marks)
- Write short notes on followings.
- 6.1 Hypertrophy (25 marks)
 - 6.2 Hyperplasia (25 marks)
 - 6.3 Atrophy (25 marks)
 - 6.4 Metaplasia (25 marks)

Date : 14th February 2023
Time : 9.00 am – 12.00 pm (Three Hours)

INSTRUCTIONS TO CANDIDATES

- This question paper consists of **SIX** questions.
- Answer **ALL** questions.
- You should write legibly in black or blue ink.
- You are not allowed to take out the examination papers.

Question 01

(100 Marks)

Describe briefly

- 1.1. Drug absorption
- 1.2. Drug metabolism

(50 marks)
(50 marks)

Question 02

(100 Marks)

- 2.1. List the types of drug interactions
- 2.2. Describe the importance of drug interactions
- 2.3. Describe the pharmacovigilance

(30 marks)
(30 marks)
(40 marks)

Question 03

(100 Marks)

Describe

- 3.1. Agonist
- 3.2. Antagonist

(50 marks)
(50 marks)

Question 04

(100 Marks)

- 4.1. What is ADME?
- 4.2. How drugs are distributed in the body?
- 4.3. What is volume of distribution?

(40 marks)
(30 marks)
(30 marks)

Question 05

(100 Marks)

- 5. Describe the drug treatment in
 - 5.1. Liver impairment
 - 5.2. Renal impairment

(50 marks)
(50 marks)

Question 06

(100 Marks)

Briefly describe drug administration in

- 6.1. Elderly patients
- 6.2. Children
- 6.3. Pregnancy

(40 marks)
(30 marks)
(30 marks)
